

Product:
Fly Select

Available in:
400g & 2Kg

Application type:
Bait

Fly Select is a granulated bait insecticide based on Azamethiphos for the control of Flies in all livestock housing. The ready to use bait contains distinct attractants which entice flies to the bait eliminating them instantly.

- *Kills by both contact or ingestion*
- *Eliminates flies virtually instantly*
- *Azamethiphos has the fastest rate of kill compared to any other chemical on the market*
- *Especially effective against resistant flies*
- *Has a bright yellow colour which is an added attractant to the flies.*

Insects Controlled by Fly Select:

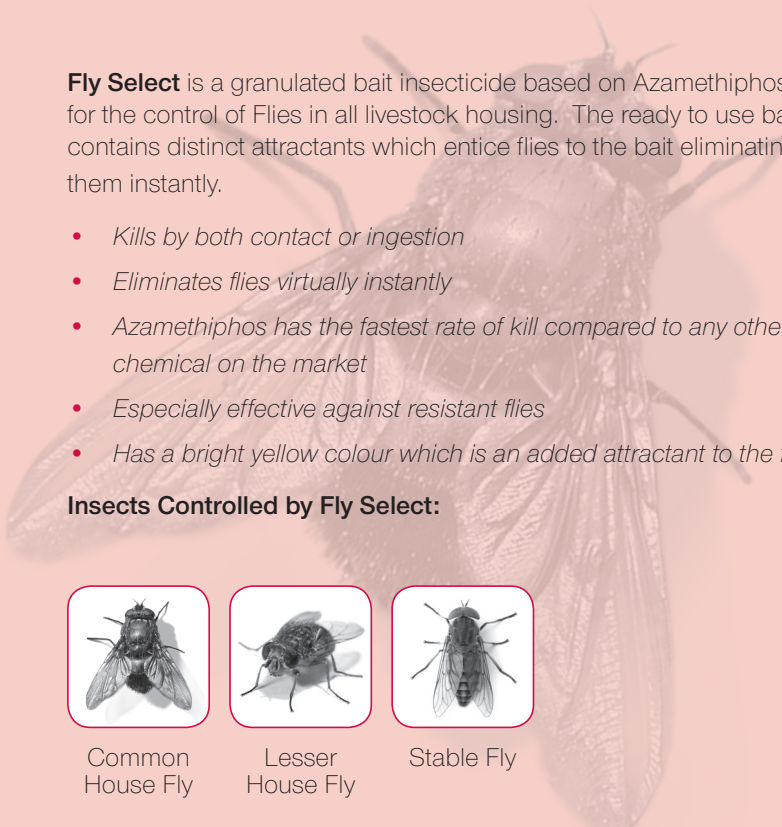

Common House Fly

Lesser House Fly

Stable Fly

Mode of Action:

Inhibits the enzyme cholinesterase in the synapses of the neurons which prevents the transmission of nerve impulses in the fly.

Method of Application:

Fly Select can be placed in containers around the affected area as feeding stations out of reach of any other animals. Fly Select can also be sprinkled on boards or cardboard squares, and lightly sprayed with water, or for best results, sprayed with cola or even egg yoke.

Application Rate:

Bait Application Sprinkle thin layers on paper, boards or dishes

Health & Safety:
